### About

PRAXI Network is the leading technology transfer and innovation support organization in Greece, bringing together 30 years of unique know-how in assisting small and medium-sized enterprises (SMEs) and research organisations throughout the country. PRAXI Network functions as a unit of the Foundation for Research and Technology – Hellas (FORTH), the largest and most well organized, equipped and staffed research centre in the country, with research successes that render it among the top worldwide. PRAXI Network has presence in 5 cities in the country: Athens, Thessaloniki, Heraklion, Volos, Patras. Since then, PRAXI Network has introduced important initiatives aiming at the technological cooperation enhancement between Greek and foreign enterprises and organisations. PRAXI Network provides innovation and technology transfer services to enterprises and research organisations for achieving innovation driven competitiveness, accessing public and private funding and exploring new market opportunities in Europe and beyond as well as exploiting and commercialising research results. PRAXI Network has been a Coordinator of the Enterprise Europe Network Hellas since 2008 interchanging its role with EKT. It is (and will be) responsible for the provision of advanced advisory and partnering services covering the whole spectrum of the EEN mandate.

## 01 step. “Company Registration”

- Objectives (1/4)

## EEN2EIC Registration

[Show all](#)

### Objective

The objective of EEN2EIC is to empower EEN network offices support potential EIC applicants, specifically women entrepreneurs and widening countries, and Seal of Excellence (SoE) holders. The project aims to develop a strong cooperation mechanism between the European Innovation Council and EEN in order to support innovation and scale up companies.

The 1st objective of the project is to support to innovative companies in a) widening countries and b) women-led innovative companies across the whole EU and HE 3rd pillar Associated Countries aiming at preparing high quality EIC Accelerator proposals.

The 2nd objective of the project is the support to EIC Accelerator Seal of Excellence (SoE) holders to obtain funding from private and/or public sources.

Provide the Diagnostic results of the [EIC AI diagnostic tool](#) \*(4/4)

\*The ratings provided are neither an evaluation or a scoring of the proposal. Therefore the ratings should not be taken as an indicator of how the proposal will be assessed by the external independent experts. However, it is strongly recommended to be used as an indicator during the needs assessment stage.

These ratings simply highlight the degree of proximity of the proposal in relation to other incremental and breakthrough projects – including and in particular “blue sky” research and technology development projects such as ERC’s and FET/EIC Pathfinder’s.

Please note that as an innovation project, the proposal is generally not expected to generate new scientific knowledge or invent a new technology (it may be the case, but not as a general rule). Rather, the Accelerator supports innovations building on technologies (breakthrough or incremental), that have the potential to disrupt existing markets or create new ones, and that could scale up at European and global levels.

Upload a screen shot of the results from EIC AI diagnostic tool  
(mandatory action)

In case of choosing **NO** (for EIC Accelerator), an extra question will be appeared regarding **“Seal of Excellence hold/funding”**. Whether pick YES, it is mandatory to fulfill [EUROQUITY](#) URL. Picking NO, the questionnaire, continuous to “Diagnostic Results”

☐ Repair of computers and personal and household goods

☐ Other personal service activities

☐ Activities of households as employers of domestic personnel

☐ Undifferentiated goods- and services-producing activities of private households for own use

☐ Activities of extraterritorial organisations and bodies
